

110V LC Convactor Heater

What is an 110V LC Convactor Heater?

A discreet wall mounted convactor heater that provides comfort heat where only a 110V supply is available. This tough steel heater is ideal for applications like site huts and is designed to withstand accidental knocks.

Key Features

- Can be mounted directly to a wall (no brackets required)
- Dark brown paint finish reduces visual impact
- Silent draught-free operation
- Robust steel construction
- 20mm cable entries at both ends for electrical connection
- External guard not required
- Compatible with many BN Thermic thermostats
