

PW PIPE FREEZE PROTECTION KITS

What is a Pipe Freeze Protection Kit?

An economic 'plug and play' kit that prevents water from freezing in plastic and metal pipes. These kits are most commonly installed on condensing boiler drain pipes but have a wide range of possible applications.

Key Features

- Built-in thermostat
- 1.5m power lead with 3-pin plug

Selection

- Installed onto pipe under insulation (20mm max)
- Straight run protects pipes up to 50mm dia
- Can be wound in an evenly spaced helix

Energy Saving Tip

Ensure the blue thermostat is installed under your lagging to ensure accurate temperature control.

Pipe Freeze Protection Kits

Model	Watts	Volts	Heated Length (m)
PW-01	12	230	1
PW-02	24	230	2
PW-03	36	230	3
