

## SystemX CEILING GRID FAN HEATERS

### What is a **SystemX** Ceiling Grid Heater?

A staple solution for heating larger commercial spaces with 600 x 600 mm grid ceilings. Multiple SystemX ceiling grid heaters can be daisy-chained and controlled from a single, easy-to-use controller, as illustrated in the diagram below. All control connections are made using Cat5 cable, ensuring a quick, reliable, and error-free installation every time.

### Key Features

- Control up to 12 heaters from a single point
- Designed to rest in the T bar of a 600 x 600 suspended ceiling
- White egg-crate grille supplied as standard
- Low profile design - only 200mm clearance required above grid
- All control connections by Cat5 cable for quick error-free installation
- Controllers do not require their own 230V supply
- BMS compatible using CX-BMS module
- Can be controlled in a group with any other model of SystemX heater

#### Energy Saving Tip

Control with a 7-day programmable thermostat to keep your running costs to an absolute minimum.
